BLAUBERG Ventilatoren

Living, Working, Enjoying – With BlauAir

Günthner Haustechnik

In this work-life-concept lives and works a mix of students, commuters and business people. There are special suites and individually furnished micropartments, with common rooms for cooking, learning and just spending time. Only a few highlights are the rooftop pool, a home cinema, gym, and a sauna area. To even increase the feelgood factor of the sauna, the central ventilation unit BlauAir CFH 800-HE was installed to provide enhanced air quality. A unique and great project, as we think!
