

WE CARE FOR FRESH AIR

HOW NICE CAN A HOME POSSIBLY BE?

REGIONAL + HIGH QUALITY + INTELLIGENT

The company SWERO GmbH & CO. KG from Wangen in the Allgäu builds modular dream homes. The modular houses are marketed in the DACH region under the brand VIV-Home in collaboration with local companies. The result are customised and ecological living spaces with useful technology that fit onto smallest grounds. Clemens Knill and Franz Stebel, CEOs of the company SWERO, trading partner and specialist in the field of thermowood, had the idea in discussions with their suppliers. As a carpenter and building engineer, Franz Stebel is closely connected to house construction and the development of solutions. The intelligent and regional realisation of that idea lead to the unique modular houses. The rooms can be arranged individually on 24, 48 or more square meters.

Franz Stebel and his partner Clemens Knill came up with the idea of the high-quality modular houses.

HOW FRESH AIR GETS INTO THE MODULAR HOUSES

A modular house of 48–50 m² is equipped with three ventilation units. The exhaust fan Sileo, which is especially quiet and energy-efficient, is installed in the bathroom to extract moist air. In the living spaces are two decentral ventilation units Vento Expert A50-1 W V.2. Due to heat- and humidity recovery, they ensure a comfortable room climate and help to lower heating costs.

REFERENCE PROJECT	MODULAR HOUSES FROM THE ALLGÄU
BUILDING TYPE	Modular houses
VENTILATION CONCEPT	Decentral
PRODUCTS	Vento Expert A50-1 W V.2, Sileo 100
ACCESSORIES	AH-10, anthracite
HOUSE SIZE	24 m ² , 48 m ² , and larger upon request
MANUFACTURER	Viv Home – Modular houses from the Allgäu Hiltensweiler 4/2 • info@viv-home.de 88239 Wangen im Allgäu www.viv-home.de

OUTER HOODS

The outer hood is available in many different colours, so that it integrates perfectly into the exterior design. Also in different duct sizes: 100, 125 and 160.
